Grade 3: Math Home Learning (Date: October 2nd)

Choose one or more math tasks to solve.

Jack throws a ball and it lands on a number line. On each number line, circle the multiple of 10 that his ball landed closest to.

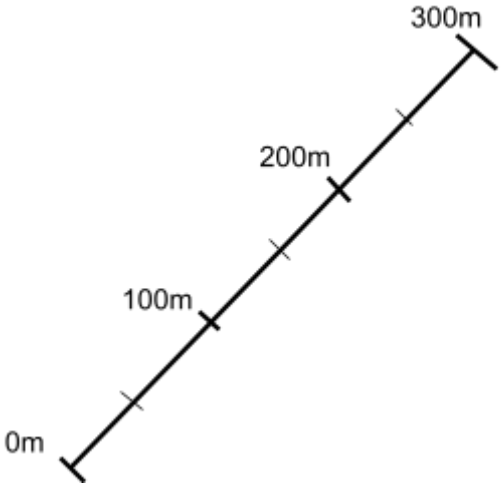

Now estimate the exact number Jack's ball landed on and write it above each ball.

Ms Jessee climbed 126m in the morning, and 128m in the afternoon.

Estimate if Ms Jessee is closer to the 200m or 300m mark on the mountain at the end of the day? Mark the place on the number line.

- Ms Anderson's class has 728 beads.
- The class is making bracelets and uses 490 beads.
- A student in the class estimates there are 200 beads left.

Do you agree? Explain why or why not.
